STAT

SUBJECT:

Secure, Non-secure and Terminal Support for MPSS Renovation

1. I request your assistance and support in resolving a potential problem, specifically the relocation of telephones and Delta Data terminals in the 2E and 2F corridors of Headquarters building, currently undergoing renovations. These modifications have been undertaken to alleviate overcrowded conditions. With approximately 50% of the renovation work done, it appears our telephone and Delta Data needs will not be met within the time frame for the contractor to complete his work nor for MPSS to install new work stations and Pleion paneling.

2. While the renovation is extensive, affecting sixty personnel in number, our request is to relocate existing secure, non-secure and Delta Data service only. If there are any questions or if I can be of further help, please contact myself or [REDACTED] who is providing MPSS coordination on my behalf.
